RE: Ad Hoc Sites

Upon reviewing the "Carlstrom Landfill" the assessment of this site is "low", due to items listed below:

- 1) Illinois Pollution Control Board is aware of their violations and has revoked their chemical wastes permit until they come into compliance.
- 2) Proposal has been written to revise site to come into compliance
- 3) IEPA is inspecting and monitoring site.

Although the site is a "low" priority it was reported that the water from the highway drainage system flows across the site. It should be verified water pollution is not occurring. There are no monitoring wells on this site and the geology is not good for a landfill operation.
